

rd seating

RD seating is designed as a practical and versatile seating solution to address all situations where comfortable public seating is required. Its elegant simplicity masks the engineering which facilitates a comprehensive and flexible seating system.

Specified worldwide for public spaces ranging from airport and ferry terminals, to hospitals, surgeries and clinics, RD seating is a proven seating solution which works.

Comfortable and functional, its light and elegant appearance belies its tough exterior. Robin Day's wealth of experience and design skills have been invested to create a product which is concerned with both comfort and safety.

The seat achieves comfort through its integral shape, offering excellent lumbar support. The covers are designed to greatly reduce vulnerability to vandalism through avoiding seams or sewing.

Options include:

- Units of 2 - 4 seat places
- With or without arms, which can be bolted to the beam in any position
- Tables which can be bolted to the beam in any position
- Tables available in three styles:
 1. Beam mounted corner table
 2. Beam mounted square table
 3. Freestanding rectangular table with optional magazine rack
- Extensive range of frame colours
- Extensive range of upholstery

All upholstered versions conform to BS 5852 ignition source 5.
